

Projectmanagement Masterclass

Success in business depends on realizing the right objectives. Even when the circumstances are difficult. The focus of this masterclass will therefore not only be on building a thorough theoretical knowledge but also on the application of the daily, often unruly practice. Learn how to achieve effective and proactive behavior, as project manager or as member of a project team.

Your view on both project management and yourself will change forever!

Integration with the Product Creation Process

This master class guarantees a **comprehensive overview** of the project management profession. It is based on the **IPMA Competence Baseline NCB 3***. A valuable addition to this baseline forms the **link to the Product Creation Process**. The master class is therefore particularly suitable for people who work in engineering and/or product development and want to understand how project management is used in conjunction with system engineering, quality management, process improvement, reliability engineering and supply chain management.

Course duration and number of participants 4 modules of one day from 9.00 am to 6.00 pm. Given the interactive form of the course the number of participants will be around 8 - 10 persons. In-company programs can also be arranged.

Teacher Teacher and author of the content of this master class is Ir. Roel Wessels, Director Project Management & Technology at Holland Innovative BV.

Location and costs Location: Holland Innovative, High Tech Campus 9, Eindhoven. The total costs for attending the four modules including the IPMA book 'Project Management based on NCB version 3', course material and tools are €2.950,- (ex. VAT) per participant. Daily drinks and lunches are included.

Dates, registration and more information See www.holland-innovative.nl under Academy, where you can also sign up. A registration form can be requested via academy@holland-innovative.nl.

The target group of this master class:

As a starting or senior **project manager, project participant, technical architect, (lead) engineers or product manager** you will benefit from this training by increasing your knowledge and skills. See www.holland-innovative.nl under Academy for the contents of this training and how this master class connects to exams and assessments.

A selection of hot topics that will be covered:

1. Leadership versus management. About 'doing the right things' and 'doing things right'.
2. How to make a planning for activities that seem hard to plan? Do not let yourself get surprised by unexpected problems, definition trajectories and change requests from the customer!
3. How to balance between risk management activities while keeping enough speed in the project?
4. How to manage your team and even more important, how to manage your customer and your environment?
5. How to integrate project management with quality, integration & release and process-improvement? About Six Sigma, FMEA, Fagan Inspections, Testing, HALT, etc.
6. Why should a project manager never get into a routine mode? About useful restlessness and the active search for problems.

** This master class meets the IPMA Competence Baseline NCB 3 requirements (IPMA C & IPMA D level).*

The participants of this master class appreciate the training with an average score of

8,7

"The way of training is greatly appreciated and the way it is done is experienced as passionate. With the target on 'project management is a profession', we are making a great start with the in-company training of Holland Innovative!"

Cris Meijnen, Coordinator Training and Education - AWL Techniek Harderwijk

Covers both IPMA C and IPMA D level

This curriculum is based on the guidelines of **IPMA** (International Project Management Association), which **guarantees an internationally proven quality and experience level**. The IPMA guidelines are based on best practices. Emphasis is on results rather than on the way to achieve this. This has resulted in a wide acceptance for IPMA. The training is an excellent preparation for the examination at CITO for IPMA at level D (starting project manager) or the theoretical exam at level C (Experienced Project Manager with demonstrable experience).

Leadership and behavior: the 'factor 10'

Mastering methods and techniques is important, however in order to achieve the **result the adequate behavior and leadership are crucial**. The 'factor 10' concept will be integrated in all subjects during the training. In addition, a full module will be spent on leadership, motivation, communication, teamwork, conflict management and other behavioral competencies.

In four days; complete overview and practical application:

Day 1 The Basics of Project Management

- Introduction; the position of the project manager within the organization
- Project management in a nutshell
- The project preparation phase and stakeholder management

Day 2 Leadership and other behavioral competencies

- Situational leadership and influence
- Social skills and teamwork

Day 3 Project Definition

- The 10 logical steps in creating a plan
- Schedules in practice: tips & tricks

Day 4 Project Execution and Control

- Project management and integral control on results
- PPP implementation, organization and finances
- Conclusion

A detailed program description is available at: www.holland-innovative.nl under Academy.

This training feels like a roller coaster!

Roel Wessels confronts his audience with statements like "the real expert (craftsman) is the one who performs well even in non-ideal conditions". Content, experiences, questions and solutions exchange rapidly, always with humor, perspective and respect for other views. The training should feel like a roller coaster: fast, groundbreaking, sometimes confusing, but coming out you want to go again...
